P179840 - Women, Leadership, and National Defense

This course supports partner nations as they develop and implement gender policies aimed at augmenting the representation and prospects for women in security and defense institutions. It provides practical, strategic, and political insights into women's inclusion and promotion within decision and policymaking processes.

P179085 - UN Peacekeeping Operations Contingent Commanders Course

The course prepares participants to take on roles and responsibilities of contingent, battalion, and sector commanders in complex peacekeeping operations (PKO) for the United Nations (UN) and other multinational organizations. Participants will learn the legal framework of UN PKO and the attendant Integrated Mission Planning Process (IMPP) and gain awareness and understanding of the various components of PKO.

P179623 - Principles of Defense Acquisition & Contract Management (English/Spanish)

This course provides participants with an understanding of the important concepts and lessons learned associated with defense acquisition decision-making and contract management. It is regionally focused for the Latin American and Caribbean context and conducted with Spanish language simultaneous interpretation.

P179548 - Fundamentals of Maritime Security

This course covers transnational maritime threats (terrorism, armed robbery at sea, smuggling and trafficking of arms, drugs and people, IUU fishing, cyber, and pollution), and provides tools, strategies, and best practices to address those threats. It emphasizes how to enhance maritime domain awareness, maritime governance, port security, institutional capacity, and human capital development.

P159200 - Principles of Defense Acquisition Management

This course provides participants with an understanding of the important concepts associated with defense acquisition and logistics decision-making in a variety of national settings. Participants will examine the complete defense acquisition life cycle from planning through equipment disposal. International best practices are discussed along with challenges and lessons learned.

P159202 - Principles of Defense Procurement and Contracting

This course provides a theoretical and practical examination of all phases of the contracting process. Fundamental concepts are discussed for both national and global defense contracting. International best practices are examined along with the challenges associated with institutionalizing efficient and effective procurement processes.

P179069 - International Defense Acquisition Negotiations

This course focuses on planning and preparing for negotiations with an emphasis on negotiation of complex issues in international armaments contracts. Particular emphasis is placed on the strategies, techniques and characteristics of good negotiators. Participants learn their negotiating style tendencies and how and when to adapt their negotiation style given the behavior and goals of the parties.

P170475 - Civil-Military Coordination in Disaster Relief

This course develops a comprehensive understanding of how national governments organize and use their armed forces to support domestic disaster response and international operations. It emphasizes cross-community understanding that focuses on the ways that armed forces, government civilian agencies, non-governmental organizations, and inter-governmental organizations can work more effectively alongside each other in disaster relief.

P179847 - Building Interagency Resilience to Hybrid Threats

This course aims to identify and enable national, regional, and collective security capacities to build resilience to countering hybrid threats using a comprehensive approach involving interagency, public-private, and international cooperation.

P179987 - Climate and Environmental Security

This course examines the science, policy, regional, and human security considerations associated with climate change and national security – incorporating current concepts in both climate and environmental security domains. Participants will explore emerging climate threats and cascading effects; identify key stakeholders and action plans; and analyze solutions for building climate resilient communities and armed forces.

P170042 - Practical Cyber Implementation

This course helps develop capabilities to defend cyberspace from attack. National security, economic prosperity, and citizen safety are threatened daily through exploitation, intrusion, or disruption in cyberspace by criminal, transnational, or regional competitors. This offering explores cyber concepts and evolving technologies for decision-makers to design and implement policies and practices for safeguarding the use of cyberspace.

P179018 - Civil-Military Responses to Terrorism

This course gives those who drive and are responsive to domestic and international counter-terrorism efforts with tools to develop effective, integrated, and forward-looking measures that go beyond force alone to prevent, combat, and contain terrorism and build resilience to terroristic violence. The course aims to deepen participants' understanding of problem sets that create conditions for terrorism.
