P159200 - Principles of Defense Acquisition Management

This course provides a theoretical examination of defense acquisition and logistics management combined with practical application in a variety of national settings. International best practices are discussed along with the challenges associated with implementation.

P159202 - Principles of Defense Procurement & Contracting

This course provides a theoretical and practical examination of both pre and post award contract phases. International best practices are examined along with the challenges associated with institutionalizing efficient and effective procurement systems.

P179069 - International Defense Acquisition Negotiations

This course focuses on planning and preparing for negotiations with an emphasis on negotiation of complex issues international armaments contracts. Extensive in-class negotiations are conducted. Participants learn their negotiating style tendencies and how and when to adapt their negotiation style given the behavior and goals of the parties.

P179548 - Civil-Military Approaches to Maritime Security

This course covers transnational maritime threats (terrorism, armed robbery at sea, smuggling and trafficking of arms, drugs and people, IUU fishing, cyber, and pollution), and provides tools, strategies, and best practices to address those threats. It emphasizes how to enhance maritime domain awareness, maritime governance, port security, institutional capacity, and human capital development.

P179018 - Civil-Military Responses to Terrorism

This course provides a holistic understanding of terrorism as one of many transnational threats all governments face. The program utilizes case studies and a table top exercise to stimulate discussion which assists in providing participants with the insight needed to design successful strategies to defeat terrorist networks, protect citizens and property, and address the root causes of terrorism.

P179896 - Strategy, Capability & Multi-Dimensional Threats

This course aims to equip participants with the skills and knowledge needed to identify complex and interactive threats and to prepare appropriate responses to address those threats at the strategic and operational levels. Multi-dimensional threats include the intersections of irregular warfare, cyber threats, hybrid threats, disinformation, transnational crime, terrorism, and displaced persons. These threats require a "whole-of-government" approach, inter-agency coordination, and regional collaboration to successfully develop, deploy, and sustain resilient capabilities informed by nuanced strategy.

P179898 - Strategies & Capabilities for Cyber Challenges

The course explores strategies and capabilities to maintain an advantage over actors who seek to exploit, disrupt, or damage critical networks, systems, and services that our societies and militaries depend upon. Instructors highlight the importance of a comprehensive approach that applies whole-of-government coordination, regional collaboration, and public-private partnership to counter cyber enabled malicious actors across the spectrum of conflict.

P179897 - Securing the State: Building Institutions for National Security

This course explores how to build the military and civilian security institutions necessary to defend the citizenry. The course offers approaches to ensure healthy civil-military relations and interagency coordination to ensure effective, whole-of-government responses to national security challenges. The course will use a mix of lecture, interactive small-group sessions and discussion with subject matter experts.

P179927 - Building Institutional Capacity in the Maritime Security Sector

This course will assist both civilian and military maritime security practitioners and decision-makers better understand current and emerging threats in order to prepare and implement appropriate service, inter-agency and regional responses at the operational and strategic levels. By demonstrating current operational doctrine, organization and global "best practices" for the planning and execution processes required to protect a nation's territorial seas and exclusive economic zone (EEZ). The course will cover risk analysis, maritime governance, enhancing maritime domain awareness (MDA) capabilities.
